Business Beliefs

Know your spend

The cost of managing health inefficiently can be extensive. Quantifying your spend on health can help you to see where efficiencies can be made.

Q: How much does your business spend on health risk management?

Leadership

Policy effectiveness

Often business intentions on health are lost within a generic health and safety policy. A separate policy focussing on how you plan to deal with health will give you more chance of success.

Q: How effective is your policy on health?

Striving for Excellence

Starting work

It's good practice to take some time to think through what needs to be done and how, to ensure risks to health are eliminated or controlled.

Q: Before your workforce start work, can they take time to think things through? What things should you and they be thinking about before starting work?
