

Selecting your Safety Climate Tool survey champions

Summary of role

The Safety Climate Tool survey champion is a supplementary role to support the day-to-day champions who sit on the steering group. Safety Climate Tool survey champions support your organisation by promoting the Safety Climate Tool survey to their colleagues in their individual work areas and encourage them to complete the survey. Once the survey has been completed and the results analysed, your Safety Climate Tool survey champions can become another channel through which to feed back the results and/or encourage discussions about how to make improvements.

Main tasks

- To champion and promote the Safety Climate Tool survey
- To provide basic information to colleagues about the survey and how the results will be fed back to colleagues
- To signpost colleagues to further information about the survey
- To promote the importance of health and safety in the workplace.

Requirements for the role

- Enthusiastic and interested in health and safety
- Approachable and helpful
- Willing to learn about why it's important to have a strong safety culture in the workplace.

Briefing your champions

You should discuss what your organisation hopes to achieve with your champions. You may decide to show them part of the Making the case or Improving the way we do things around here presentations depending on their role in your organisation. Also give your champions a copy of the Frequently asked questions.
